Technique and Buildings

Strukton shoulders the entire burden for buildings in this market by taking on the responsibility for the design, the execution, the management and the maintenance.

Commercial operation: integrated facility services and real estate management

Management and maintenance: structural, installed systems and energy

Realisation: new construction and renovation of buildings and technical systems, including making properties more sustainable through innovative contract forms

Project development and redevelopment: creating opportunities for living, working, being healthy and learning. In short, improving the quality of life
